

Project no.:
240837

Project acronym:
RISCS

Project title:
Research into Impacts and Safety in CO₂ Storage

Contract type: Collaborative Project

Start date of project: 2010-01-01
Duration: 4 years

D 5.4 b3
Updated version of the website (month 18)

Revision: **Draft**

Organisation name of lead contractor for this deliverable:
Istituto Nazionale di Oceanografia e di Geofisica Sperimentale

Project co-funded by the European Commission within the Seventh Framework Programme (2007-2013)		
Dissemination Level		
PU	Public	x
PP	Restricted to other programme participants (including the Commission Services)	
RE	Restricted to a group specified by the consortium (including the Commission Services)	
CO	Confidential , only for members of the consortium (including the Commission Services)	

Deliverable number:	D 5.4b
Deliverable name:	Updated version of the website (month 18)
Work package:	WP 5 Research Integration and Dissemination
Lead contractor:	OGS

Status of deliverable		
Action	By	Date
Submitted (Author(s))	Barbara Merson, Sergio Persoglia - OGS	2011-09-05
Verified (WP-leader)	First name Last name, short org. name	yyyy-mm-dd
Approved (Coordinator)	First name Last name, short org. name	yyyy-mm-dd

INTRODUCTION

This report provides a summary of the major updates applied to the RISCS website (www.riscs-co2.eu) during the period January-June 2011.

The website has been designed and implemented by Barbara Merson and Sergio Persoglia (OGS) by using the NetScience software tool developed by Promoscience. The website development and its updates are managed through RISCS Work Package 5: Research Integration and Dissemination.

1. THE PUBLIC PART OF THE PROJECT WEBSITE – MAJOR UPDATES

Here are presented the major updates applied to the public part.

- Publications

During this period the first Newsletter of the project has been produced within the Work Package 5 (OGS has carried out the graphic layout).

In order to give the most possible diffusion, the Newsletter has been added to the RISCS home page and from here it is publicly downloadable.

Furthermore, the Newsletter has also been added to the Publications page. Here a new tool has been implemented in order to allow the visitors to leave their email address and to be automatically alerted when a new publication is uploaded on the website.

In the Publications section has also been implemented the Search tool: now it's possible to visualize the publications grouped by year or by type (article, brochure, ...), or by a free text search. It's important to note that the system search the word not only in the title, but also in the abstract and in the entire text.

2. THE RESTRICTED PART OF THE PROJECT WEBSITE – MAJOR UPDATES

Here are presented the major updates applied to the restricted part.

- *The Search tool*

A new application has been added to the restricted area of the website: the Search tool. This tool allows the participants to, once logged in, search a specific word within the following pages: Partners, WPs, Files and News. The results are ordered in a list of the pages containing the searched word. It's important to note that the system shows not only the pages, but also the files stored in the website where the searched word appears.

Figure 2.1 – The Search tool in the restricted part of the website

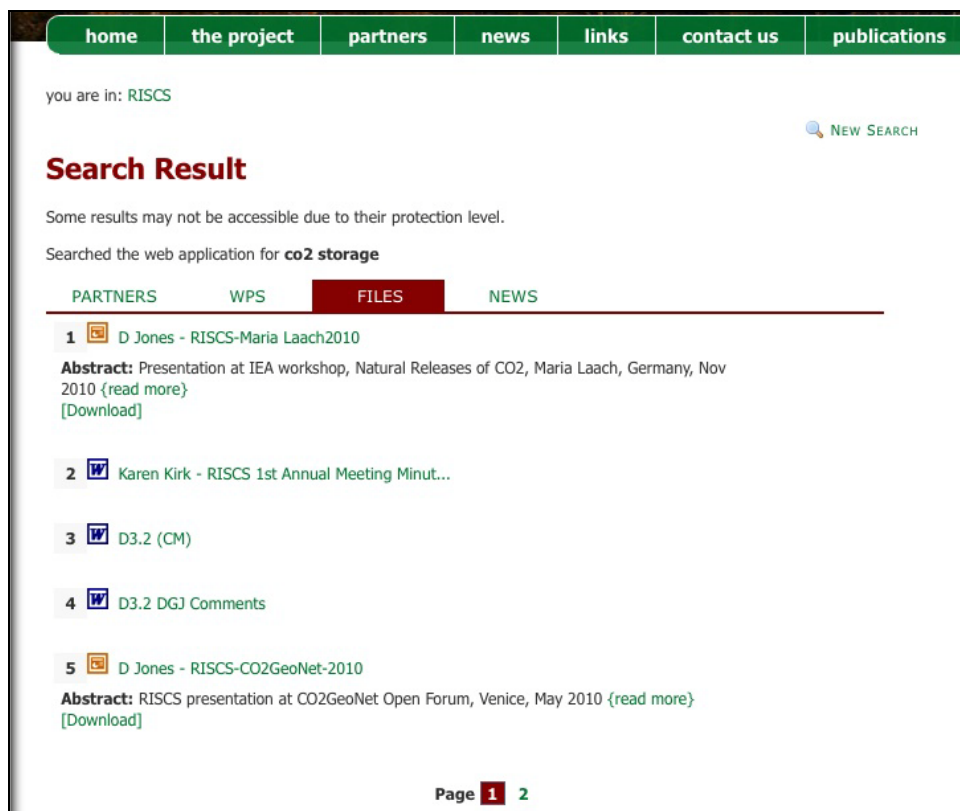

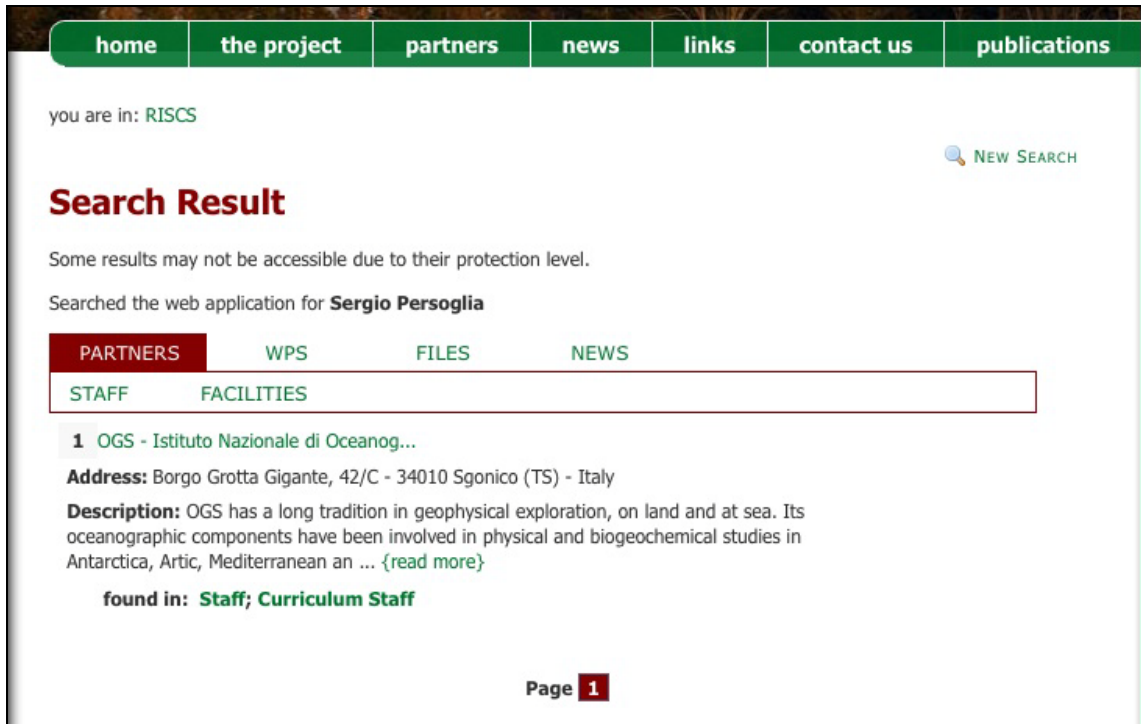

Figure 2.2 – The results of the searched word grouped in Partners, WPs, Files and News

The Search tool could be also used to find the contact details of a specific participant.

The screenshot shows a web application interface with a green navigation bar at the top containing links for 'home', 'the project', 'partners', 'news', 'links', 'contact us', and 'publications'. Below the navigation bar, it indicates 'you are in: RISCs' and provides a 'NEW SEARCH' button. The main heading is 'Search Result', followed by a note that some results may not be accessible due to their protection level. The search query is identified as 'Sergio Persoglia'. A horizontal menu below the search bar includes 'PARTNERS', 'WPS', 'FILES', and 'NEWS', with 'PARTNERS' selected. Underneath, 'STAFF' and 'FACILITIES' are listed. The search results show one entry: '1 OGS - Istituto Nazionale di Oceanog...'. The entry details include the address 'Borgo Grotta Gigante, 42/C - 34010 Sgonico (TS) - Italy' and a description of OGS's work in geophysical exploration. The result is categorized as 'found in: Staff; Curriculum Staff'. At the bottom of the page, it indicates 'Page 1'.
