Abstract The Editors and Staff of *Earth and Space Science* thank the reviewers whose selfless work has significantly contributed to the publication process of papers highlighting the best research in geophysics, planetary, and space science in 2024. Peer-reviewing is a demanding and thankless job. It is however an essential component of the scientific process, requiring the highest standards of integrity and rigor. Reviewers check data and procedures and test reproducibility of methods and results; they share their expertise to verify that the interpretations and conclusions of a paper are consistent with assumptions and existing knowledge. Without this essential work, it would not be possible to trust in the scientific process. Publication of papers in a multidisciplinary journal such as *Earth and Space Science*, that highlights methods, instruments, data and algorithms, relies directly on the expertise of its reviewers to verify and vouch for the quality of the papers that are published. We are indebted to all our reviewers and are delighted to acknowledge them publicly in this Editorial.

Plain Language Summary The Editors and Staff of *Earth and Space Science* acknowledge the importance of hundreds of peer reviewers who contributed to the scientific rigor of the papers published in the journal. The Editors wish to publicly recognize the 914 reviewers who gave selflessly of their time and expertise in 2024.

1. Reviewers' List

In 2024 *Earth and Space Science* received 569 submissions, publishing 282 articles. We received 1,365 peer reviews by 914 individuals, many of whom provided multiple reviews. Their names follow. *Italicized* names indicate individuals who provided two or more reviews.
